

### Letter of Recommendation

I am honored to support Mr. Sarthak Parakh as a candidate for the Master's degree program at your esteemed university. I have seen him evolve from his freshman year to senior year at Acropolis and can say that he is one of the brightest and task-oriented individuals with a variety of skills and has consistently raised the bar higher. I've been teaching and researching for around five years and specialized in Object-Oriented Programming, JAVA Programming, Cloud Computing, and AWS.

I have had the fortune to teach him Object-Oriented Programming and Methodologies, JAVA Programming, Cloud Computing. Additionally, I was his class coordinator in his second year and project coordinator in his final year. For my subjects I would rank him in the top 1% among his batchmates. His ability to perceive abstract concepts and make crucial inferences based on theory is remarkable. He has come up with interesting solutions to the problems I posed during the lectures. Through his pre-final and final year projects, he tried to solve some real-life problems in the agriculture and education sector. His role in the team was of a team leader and technical developer, which he fulfilled exceptionally along with producing desired results.

His inquisitiveness for the courses was clear to me from his thought-provoking questions in and out of the class. His keen sense of class participation was apparent to me from the way he used to put forth his concepts in class discussions thus enriching his conceptual base and also of the class. I have seen him assisting his classmates who were facing problems with concepts of the subject and problems given to solve in the class. He has the ability to clearly express his point because of his clear ideas and concepts and awareness about their applications which also helped him clear his interviews.

He is a bright and diligent individual who loves to take on challenges. His forte lies in his remarkable communication skill, presentation skills, independent thinking, and knack for problem-solving. He is a quick and competent learner and accepts criticism of his work maturely and is always open to suggestions for improvement. He has distinguished himself with his focused approach, intellect, and determination to excel in whatever he does.

The professionalism that Sarthak exhibited during the implementation of his projects, department activities, or other Entrepreneurship Development Cell activities differentiates him. Through his extracurricular participation, he built a great network and groomed his personality.

Sarthak has exceeded our expectations on most counts and has been an asset to our college. He possesses an innate aptitude for the field of Computer Science and would do well to enhance his knowledge and understanding of the field through a graduate program. Going forward, I strongly believe he has the ability to excel in a competitive environment be it academics or professional and given his ardent desire to undertake his graduate studies. I am sure he will put a hundred percent effort into this endeavor. I have immense faith in Sarthak's abilities and highly recommend him for admission to your Master's program and any financial assistance.
